PRESENTAZIONE

DESCRIPTION

Le pompe in Tamdem (o pompe multiple) sono disponibili in esecuzione STANDARD e T.C. (Tandem corto) e possono essere a due o più stadi.

La versatilità delle nostre pompe consente il montaggio di una pompa multipla utilizzando pompe singole ed effettuando solo operazioni di disassemblaggio/assemblaggio di estrema semplicità.

- Tutte le pompe Galtech sono già predisposte per il traino di una successiva pompa.

- Una quantità molto limitata di kit "flangia di collegamento e accessori" permette di mantenere un basso valore nel magazzino e soprattutto di dare un servizio rapido agli utilizzatori finali.

CARATTERISTICHE TECNICHE

TECHNICAL FEATURES

- Le prestazioni delle unità che compongono la pompa multipla sono identiche a quelle delle singole pompe corrispondenti.

- La coppia massima di rotazione della pompa multipla è determinata dalla pompa con velocità minore.

- La coppia massima assorbita da ogni singola unità, tale da consentire il limite di funzionamento alla pressione massima di impiego, si calcola come segue:

$$M = \frac{c \times p}{64}$$

dove:

M = Coppia massima assorbita (Nm)

c = Cilindrata pompa (cm³/giro)

p = Pressione massima di impiego (bar)

- La somma delle coppie assorbite dalle singole pompe non deve essere superiore alla coppia massima ammessa sull'albero principale (vedi tabella).

La coppia massima assorbita dalle pompe seguenti non deve essere superiore alla coppia trasmissibile dal tramo della pompa precedente.

- La potenza assorbita dalla pompa multipla è data dalla somma delle potenze assorbite dalle singole pompe, si calcola come segue:

$$P = \frac{c \times n \times p}{603000}$$

dove:

P = Potenza massima assorbita (Kw)

c = cilindrata pompa (cm³/giro)

n = Numero di giri massimo (giri/min)

p = Pressione massima di impiego (bar)

The multiple pumps are available in STANDARD and T.C. (short-tandem) versions.

The versatility of our pumps permits the assembling of a multiple pump using a single pump and making only a simply operation of disassembly/assembly.

- All our standard pumps are already present to engage another pump.

- A very limited quantity of kit "flange connections and accessories" gives a small stock value and mainly a rapid assistance to final users.

DESIGNAZIONE

DESIGNATION

Tandem STANDARD

Sono possibili combinazioni di tutti i gruppi pompa (Gr.1 - Gr.2 - Gr.3 e Gr.4).
L'aspirazione di ogni singola unità è indipendente.

Esempio di ordinazione in codice / Example of ordering code

2SP A14 + 1SP A4.2 D SAE A - 10 G (VT)

Tandem CORTO

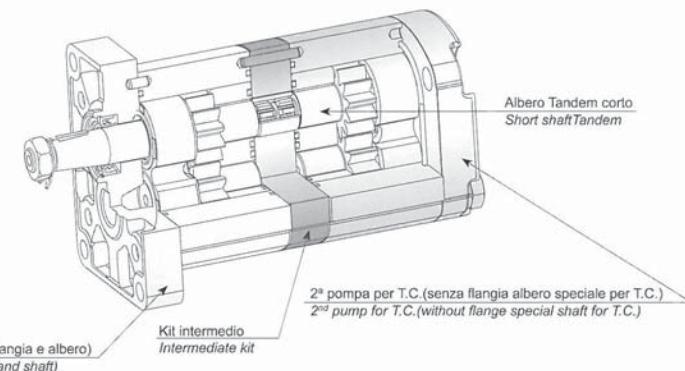

SHORT Tandem

- Non possibile con pompe Gr.4.

- Dimensioni più contenute rispetto al tandem standard.
- Le aspirazioni dei vari stadi sono in comunione fra loro.
- Possibilità di aspirazione unica fra i vari stadi (consultare nostra società)

- Not possible with Gr.4 pumps.

- Low dimensions respect to the standard tandem.
- The suctions of the different pumps are connected.
- Possibility to have only one suction among the different pumps (contact our factory)

Il Kit standard viene fornito con tiranti e dadi autobloccanti (max. ingombro C); se le pompe tandem sono fornite già assemblate, l'ingombro C è leggermente inferiore in quanto vengono utilizzate viti TCEI (consultare il ns. servizio tecnico per avere gli ingombri esatti).

The standard Kit is supplied with tension rods and self-locking nuts (max. dimension C); if the tandem pumps are supplied already assembled, the external dimensions of C are slightly less because socket-head screws are used (contact our technical service for the exact dimensions).
