Body Type			Line mount	
Body Features		Direct mount, cross pilot, 2 gasket ports		
	Cavity		T-2A	

## **Special Notes**

• **Important:** Please carefully consider the maximum system pressure to which the manifold will be exposed. The pressure rating of the manifold is dependent on the manifold material, with the port type and sizing a secondary consideration. For example, manifolds constructed of aluminum are not rated for system pressures higher than 3000 psi (210 bar), regardless of the port type and size specified.
