# 2.3:1 pilot ratio, semi-restrictive counterbalance valve CAPACITY: 80 L/min. | CAVITY: T-2A

Counterbalance valves with pilot assist are meant to control an overrunning load. The check valve allows free flow from the directional valve (port 2) to the load (port 1) while a direct-acting, pilot-assisted relief valve controls flow from port 1 to port 2. Pilot assist at port 3 lowers the effective setting of the relief valve at a rate determined by the pilot ratio.

Other names for this valve include motion control valve and over center valve.

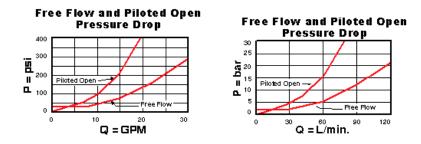

| Cavity  | T-2A                     |
|---|--------------------------|
| Series  | 2                        |
| Capacity  | 80 L/min.                |
| Pilot Ratio   | 2.3:1                    |
| Maximum Recommended Load Pressure at Maximum Setting              | 270 bar                  |
| Maximum Setting   | 350 bar                  |
| Factory Pressure Settings Established at                          | 30 cc/min.               |
| Maximum Valve Leakage at Reseat                                   | 0,3 cc/min.              |
| Adjustment - Number of Counterclockwise Turns to Increase Setting | 3.75                     |
| Operating Characteristic  | Semi-restrictive         |
| Reseat  | >85% of setting          |
| Valve Hex Size  | 28,6 mm                  |
| Valve Installation Torque   | 61 - 68 Nm               |
| Adjustment Screw Internal Hex Size                                | 4 mm                     |
| Adjustment Locknut/Cap Hex Size                                   | 15 mm                    |
| Adjustment Nut Torque   | 9 - 10 Nm                |
| Seal kit - Cartridge  | Buna: 990-202-007        |
| Seal kit - Cartridge  | Polyurethane: 990-002-00 |
| Seal kit - Cartridge  | Viton: 990-202-006       |
| Model Weight  | 0.29 kg.                 |

### TECHNICAL FEATURES

- Counterbalance valves should be set at least 1.3 times the maximum load induced pressure.
- Turn adjustment clockwise to decrease setting and release load.
- Full clockwise setting is less than 200 psi (14 bar).
- Backpressure at port 2 adds to the effective relief setting at a ratio of 1 plus the pilot ratio times the backpressure.
- Reseat exceeds 85% of set pressure when the valve is standard set. Settings lower than the standard set pressure may result in lower reseat percentages.
- Sun counterbalance cartridges can be installed directly into a cavity machined in an actuator housing for added protection and improved stiffness in the circuit.
- Two check valve cracking pressures are available. Use the 25 psi (1,7 bar) check unless actuator cavitation is a concern.
- This valve has positive seals between all ports.
- All 3-port counterbalance, load control, and pilot-to-open check cartridges are physically interchangeable (i.e. same flow path, same cavity for a given frame size).
- Incorporates the Sun floating style construction to minimize the possibility of internal parts binding due to excessive installation torque and/or cavity/cartridge machining variations.
